SUMMARY

A recent Computer Science graduate with a strong foundation in software development principles, eager to apply academic knowledge to real-world challenges. Passionate about backend development and creating practical, impactful applications. Seeking an opportunity in a dynamic and growth-driven environment where I can contribute meaningfully, learn from experienced mentors, and grow into a successful software engineer.

TECH STACK

- JAVA
- mysql
- springboot
- HIBERNATE
- JPA
- C,C++
- HTML, CSS
- Javascript
- Vs code,eclipse,Intelij

INTERNSHIPS

- **Completed 6 Months Internship As Java Backend Intern At RAYNX PRIVATE LIMITED**— Completed in 2025 (AUG-JAN)

PROJECT:Customer Support Ticketing System **2025**

I developed the backend for a Customer Support Ticket Management System using Spring Boot and MySQL, aimed at streamlining customer service operations. The application allows customers to raise support tickets and track their issue status, while admins can assign tickets to support agents and monitor overall progress. Support agents are able to update ticket status, add comments, and resolve issues directly through the system. The backend includes secure role-based authentication, automatic ticket ID generation, and flexible search and filter functionality, along with support for real-time status updates to ensure smooth communication between all users.

PROJECTS

Secure Data Transfer and Deletion from Counting Bloom Filter in Cloud Computing **2024-2025**

Designed and implemented a secure cloud-based system using Counting Bloom Filters to enhance the efficiency and privacy of data transfer and deletion. The project focused on minimizing memory usage while enabling fast data access and secure, irreversible deletion of cloud data. It ensures data integrity, reduces the risk of unauthorized recovery, and supports privacy-preserving cloud storage operations.

Using Data Mining to Predict Hospital Admissions from the Emergency Department **2025**

This project focused on using patient data from the emergency department to predict whether a patient needs to be admitted to the hospital. By using data mining techniques, we found patterns in the data and built a model that helps doctors make faster and better decisions. The goal was to improve patient care and reduce waiting time in hospitals.

CERTIFICATES

- **Full Stack JavaScript Development from Nirman Organization** — Completed in 2025 (APRIL-JUNE)
- **Python Developer Certificate** - SoloLearn — Completed in 2025

EDUCATION

SRI INDU INSTITUTE OF ENGINEERING AND TECHNOLOGY 2021-2025
Computer Science and Enginnering with CGPA:73%

PRAGATHI JUNIOR COLLEGE 2019-2021
MPC with CGPA:90%

SREE CHETHANA HIGH SCHOOL WITH CGPA:97% 2018-2019

HOBBIES

- Learning new programming languages
- Singing and dancing
- Building mini projects

DECLARATION

I hereby declare that all the information provided in this resume is accurate and authentic, and I take full responsibility for its correctness.
